# Intensive Skin Therapy

**DriGo-HP™**  
Antibacterial Wicking Sheet  
With Hydrogen Peroxide  
For moisture management,  
comfort & odor control

Wicks moisture out of skin fold

Helps prevent odor

Keeps working up to 5 days

Available in 2 Sizes

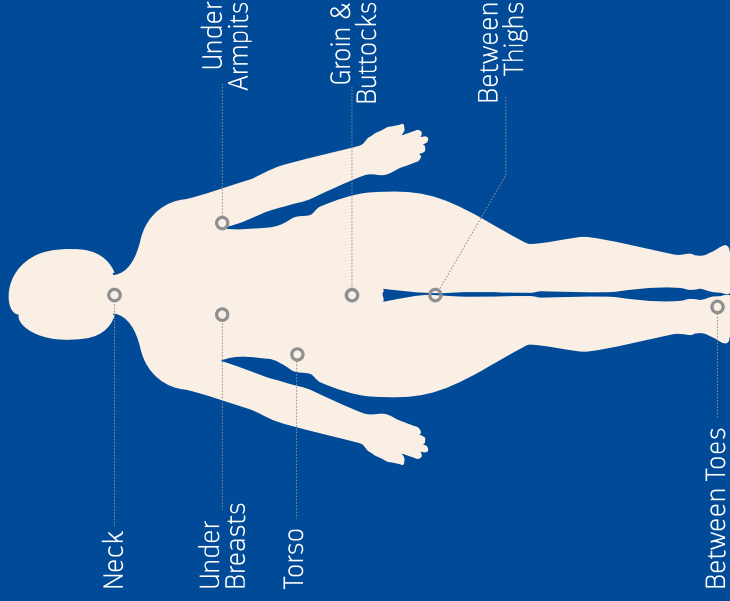

## Better skinfold health

Skin friction in moist, warm areas anywhere on the body can cause minor irritation leading to more serious conditions. DriGo-HP™ uses encapsulated Hydrogen Peroxide to reduce bacteria within the fabric. This product is an ultra smooth, soft, wicking fabric that helps reduce further damage in vulnerable areas.

## EFFECTIVE ON A MULTITUDE OF AREAS

## TRIPLE ACTION

- 1 WICKS MOISTURE**  
Wicking fabric translocates moisture outside the skinfold to keep the skinfold dry.
- 2 REDUCES BACTERIA IN THE CLOTH**  
Our unique fabric utilizes patented technology to slowly release Hydrogen Peroxide, reducing the build-up of bacteria in the textile, diminishing odors, and ensuring long-lasting comfort for up to 5 days.
- 3 SHIELDS FROM FRICTION**  
Ultra-soft, smooth fabric reduces friction that causes skin irritation & damage.

## DriGo-HP™ from Medline Remedy®

DriGo-HP is the latest addition to the Remedy line of Intensive Skin Therapy products. As the industry leader in skincare at health facilities nationwide, Remedy is committed to constantly improving skincare for patients and residents at every type of facility.

Flexible to cut in any size or shape, leaving a few inches outside the skinfold to allow evaporation.

### THE RISKS OF DAMAGED SKIN

Excessive moisture that is left on the skin for prolonged periods of time can lead to damaged skin. Compromised skin integrity may lead to irritation, embarrassing odor, and discomfort during movement.\*
